HOW TO USE THIS MODEL

Ashworth & Kensington Holdings plc — Integrated Financial Model

Version:	v1.0
Last Updated:	July 2026
Author:	Deepika Kumari
Purpose:	Educational Portfolio Project

1. Overview

This workbook is a fully-linked, three-statement financial model for a fictional holding company with three segments (Heritage Textiles, Private Wealth Advisory, Fine Estates). It builds a bottom-up revenue forecast, rolls it through the Income Statement, Balance Sheet, and Cash Flow Statement, and produces two independent valuations — a Discounted Cash Flow and a Comparable Company analysis — which are reconciled in a single valuation range. Every number in the model is either a hard-coded

2. Color Conventions (used consistently on every sheet)

■ Blue text	A hard-coded input you can safely change — historical actuals, assumptions, or scenario values.
■ Black text	A formula. Do not overwrite — it calculates automatically from other cells.
■ Green text	A link that pulls a value from another sheet, so you can trace where a number came from.
■ Gold fill	A key output, subtotal, or the “selected” scenario value — the number you most want to look at on that sheet.

3. How the Model Flows

► Scenarios	Choose Bear / Base / Bull from the dropdown — this is the master switch for the entire model.
► Assumptions	Macro, margin, and capital-structure drivers. Scenario adjustments are layered on here.
► Revenue Build	Units Sold × Average Selling Price, by segment, rolls up to Total Revenue.
► Income Statement	Revenue flows down to Net Income using the margin assumptions and Debt Schedule interest.
► Working Capital / Debt Schedule	Supporting schedules for AR/Inventory/AP (DSO/DIO/DPO) and the debt roll-forward.
► Balance Sheet / Cash Flow	Fully articulated and mechanically balanced — see the Checks tab.
► DCF Valuation / Comparables	Two independent valuations, reconciled on the Comparables tab's valuation range.
► Sensitivity / Econometrics	WACC × growth data table, CAPM beta regression, and macro regressions.
► Checks	Ten automated integrity tests — everything should read  PASS.

4. Running a Scenario

Go to the Scenarios tab → click the dropdown in cell C6 → choose Bear, Base, or Bull. Every projected assumption (volume growth, pricing, margins, WACC, terminal growth) updates immediately via CHOOSE() / INDEX() / MATCH() formulas, and the change flows all the way through to the Dashboard KPIs: the DCF implied share price, and the Comparables valuation range.

5. Named Ranges (Name Box or Ctrl+G to jump)

Scenario_Selector	The Bear/Base/Bull dropdown cell
WACC	Scenario-adjusted discount rate
Terminal_Growth_Rate	Scenario-adjusted terminal growth rate
Implied_Share_Price_DCF	DCF Valuation tab's headline output
Implied_Valuation_Range_Low	Low end of the all-methods valuation range
Implied_Valuation_Range_High	High end of the all-methods valuation range

6. Notes & Disclaimer

Ashworth & Kensington Holdings plc is a fictional company created for illustrative and educational

EXECUTIVE DASHBOARD

■ Blue = Input ■ Black = Formula ■ Green = Link to Another Sheet

Ashworth & Kensington Holdings plc — FY2030E Snapshot

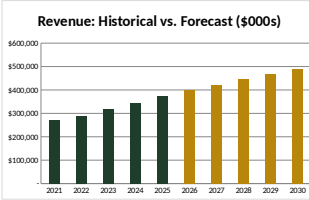

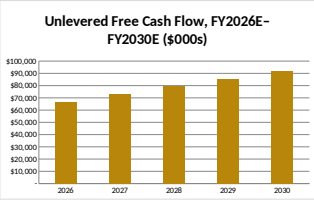

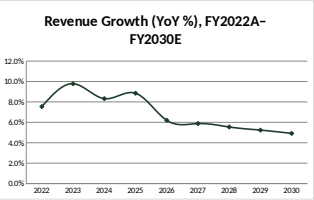

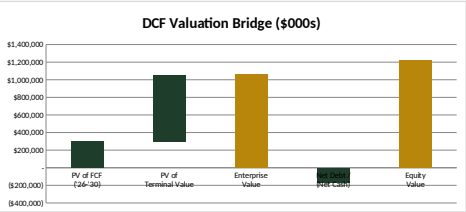

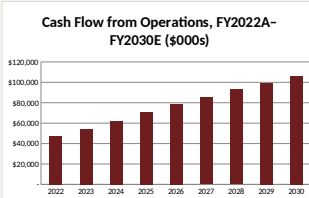

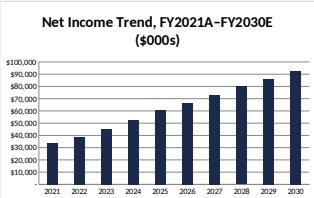

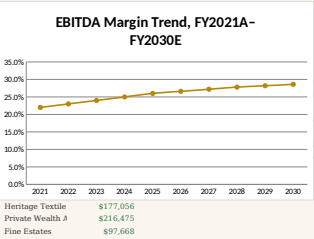

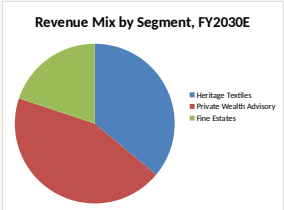

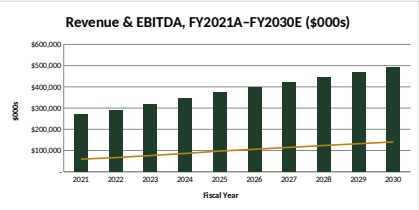

Total Revenue (FY30E)
\$491,199
25-30 CAGR:
5.6%

EBITDA (FY30E)
\$140,483
EBITDA Margin:
28.6%

Net Income (FY30E)
\$92,298
Net Margin:
18.8%

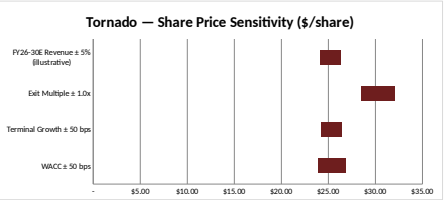

Diluted EPS (FY30E)
\$1.90
WACC:
10.0%

Implied Share Price
\$25.25
Beta:
1.31

Tornado — Share Price Sensitivity to Key Drivers

Driver	Low	High	Swing
WACC ± 50 bps	\$23.87	\$26.81	\$2.94
Terminal Growth	\$24.21	\$26.43	\$2.21
Exit Multiple ± 10x	\$28.48	\$32.08	\$3.60
FY26-30E Reven	\$24.16	\$26.34	\$2.18

SCENARIO ANALYSIS

■ Blue = Input ■ Black = Formula ■ Green = Link to Another Sheet

Active Scenario

Base

Scenario Index (1 = Bear, 2 = Base, 3 = Bull) 2

Narrative
Bear: recessionary volume pullback, pricing pressure, wider discount rate. Base: steady-state continuation of current trends. Bull: accelerating client wins, pricing power, and margin expansion.

Adjustment vs. Base Case (percentage)	BEAR	BASE	BULL	IMPACT
Heritage Textiles — Units Growth Adj.	(1.5%)	-	1.5%	-
Private Wealth — Client Growth Adj.	(2.5%)	-	2.5%	-
Fine Estates — Transaction Growth Adj.	(2.0%)	-	2.0%	-
Heritage Textiles — ASP Growth Adj.	(0.6%)	-	0.6%	-
Private Wealth — Fee/Account Growth Adj.	(0.5%)	-	0.5%	-
Fine Estates — Avg. Fee Growth Adj.	(0.5%)	-	0.5%	-
Gross Margin Adj.	(1.2%)	-	1.0%	-
SG&A % Adj. (+ = higher cost)	1.0%	-	(0.8%)	-
Terminal Growth Rate Adj.	(0.5%)	-	0.4%	-
WACC Adj. (+ = higher discount rate)	0.6%	-	(0.5%)	-

Comps — P/E (range)	\$21.44	\$28.17	\$25.42		
Implied Valuation Range	\$21.17	\$34.64	\$27.84		
	DCF - Perpetuity	DCF - Exit Mult.	Comps - EV/EBITDA	Comps - EV/Rev	Comps - P/E
(chart helper) base = Low	\$21.17	\$28.48	\$24.19	\$23.15	\$21.44
(chart helper) span = High - Low	\$11.01	\$3.60	\$7.64	\$11.49	\$6.73

SENSITIVITY ANALYSIS — IMPLIED SHARE PRICE

■ Blue = Input ■ Black = Formula ■ Green = Link to Another Sheet

Two-Way Data Table: WACC (rows) × Terminal Growth Rate (columns)

WACC \ Terminal Growth		1.3%	1.8%	2.3%	2.8%	3.3%
9.0%	9.0%	\$25.99	\$27.21	\$28.62	\$30.25	\$32.18
	9.5%	\$24.56	\$25.61	\$26.81	\$28.20	\$29.80
	10.0%	\$23.30	\$24.21	\$25.25	\$26.43	\$27.78
	10.5%	\$22.17	\$22.97	\$23.87	\$24.89	\$26.05
	11.0%	\$21.17	\$21.87	\$22.66	\$23.54	\$24.54

Base case (center cell, gold) matches the DCF Valuation tab's implied share price.
Each cell independently recomputes Enterprise → Equity Value → Share Price for its WACC/g pair.

Private Wealth Advisory	0.66	1.00	0.61	
Fine Estates	0.21	0.61	1.00	

MODEL INTEGRITY CHECKS

■ Blue = Input ■ Black = Formula ■ Green = Link to Another Sheet

Overall Status

✓ ALL CHECKS PASSED

Assets = Liabilities + Equity

✓ PASS

Balance Sheet's Balance Check row (Assets – Liab&Equity) is tested for all 10 years; must equal zero (within \$0.01) every year.

Cash Flow Reconciles to Balance Sheet

✓ PASS

Ending Cash on the Cash Flow Statement is tested against the Cash balance carried on the Balance Sheet for FY2022-FY2030.

Net Income Linked Correctly

✓ PASS

Confirms Net Income flows identically from the Income Statement into the Cash Flow Statement, and that Retained Earnings rolls forward by exactly Net Income each year (no dividends/plugs).

No Formula Errors (REF, DIV-by-zero, N/A, etc.)

✓ PASS

Scans every statement, the revenue build, assumptions, sensitivity grid, and econometrics lab for any error-valued cell.

Circular References = 0 (Design Confirmation)

VERIFIED BY DIO

Unlike the other rows on this sheet, this is not a live formula test — no worksheet formula can detect circularity. It is manually confirmed: debt is a scheduled roll-forward (opening + new borrowings – repayments, each a manual input) rather than a cash-sweep revolver, so ending debt and interest expense never depend on the cash flow they help produce. You can independently verify this via Excel's Formulas > Error Checking > Circular References menu (will report none), with iterative calculation OFF.

Segment Revenue Ties to Total

✓ PASS

Heritage Textiles + Private Wealth Advisory + Fine Estates revenue sums to Total Revenue for all 10 years.

Units × ASP = Segment Revenue

✓ PASS

Heritage Textiles Revenue independently recomputed as Units Sold × Average Selling Price and compared to the reported Revenue line.

Sensitivity Base Case Matches DCF

✓ PASS

The center cell of the WACC × Terminal Growth sensitivity grid (Sensitivity!F11) is cross-checked against the DCF tab's Implied Share Price.

Debt Schedule Ties to Balance Sheet

✓ PASS

Ending Debt Balance on the Debt Schedule is tested against the Long-Term Debt line carried on the Balance Sheet for all 10 years.

Working Capital Schedule Ties to Balance Sheet

✓ PASS

Accounts Receivable, Inventory, and Accounts Payable on the Working Capital schedule (DSO/DIO/DPO-driven) are tested against the corresponding Balance Sheet lines.
